1 Index Fingers on Brake Levers
2 Gently Squeeze Both Levers
3 Heels Down & Hips Back
RIDE SMART
SLOW DOWN BEFORE YOU SPEED UP. Crashes can happen on your first lap. Ride the trail multiple times to get familiar with the features and equipment you're on so you can confidently push your limits without pushing your threshold. Jumping skills are required for free-ride trails.
PRE-RIDE
Warm up the brain and body by inspecting the trail at low speed. Take the time to check your equipment.
RE-RIDE
Lap the trail a few times and get to know the flow of the feature.
FREE-RIDE
Start small and work your way up to faster speeds and larger features.
